

## Audi TT

**The Audi TT has been a style icon from day one.**

And today, it's never looked better. With a second generation Audi Space Frame that's 69% aluminum and 31% steel, its safety, performance, handling and fuel consumption have all improved. And with a speed-activated spoiler, quattro permanent all-wheel drive, and optional Audi magnetic ride, the TT of the past has been taken to groundbreaking new levels. Now with a 211-hp 2.0 TFSI engine and Audi valve lift technology, not to mention a six-speed S tronic transmission, striking LED daytime running lights, and a whole host of interior upgrades, this car deserves to be set free.

## Audi TTS

**Beauty and ferocity united.** From a distinct radiator grille, front brake calipers and sleek tail profile to high-resolution dials, lap timer and an ergonomically designed gear knob, the Audi TTS Coupe and Roadster resonate with spectacular sport-specific design. While a 265-hp TFSI engine delivers all the power required to rocket this four-wheeled escape pod into the stratosphere, quattro all-wheel drive guarantees it will hug the road with absolute resolve.
