

BMW 6 Series Coupé
BMW 6 Series
Convertible

Sheer
Driving Pleasure

Performance can take many forms. The most beautiful is presented here.

What a pity that you see your Coupé from the outside so rarely.

Take two deep breaths.

The world is yours to discover. Where will you start?

Life offers so many opportunities. Why limit yours?

This has gone in.

The pleasure you get from driving a BMW is the result of fine engineering – always setting the benchmark because it is based on much more than engine power. This is the tradition behind BMW EfficientDynamics. It includes the visionary CleanEnergy hydrogen-powered engine, already used in a number of completely emission-free BMW 7 Series saloons. Also going into production soon is the BMW ActiveHybrid – an intelligent, demand-oriented combination of internal combustion engine and electric motor. And every BMW already includes a multi-award winning BMW EfficientDynamics technology package as standard that boosts dynamics even further whilst simultaneously reducing fuel consumption and CO₂ emissions.

High Precision Injection

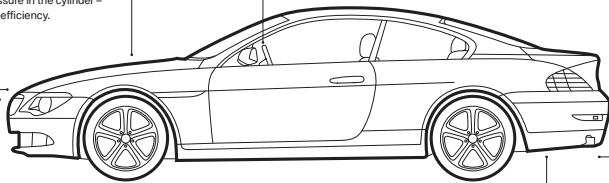

In this cutting-edge generation of petrol direct injection, the Piezo injectors are positioned very close to the spark plugs. They inject the fuel at high pressure and with extreme precision. Several injections are possible per ignition process. Thanks to fast and flexible electronic control, the timing and quantity of the injections can be precisely adjusted to the power requirement, the temperature and the pressure in the cylinder – for more output and greater efficiency.

Valvetronic

Valve lift control is fully variable in engines with Valvetronic. The result is improved cold start behaviour and smoother running, as well as a significant drop in fuel consumption.

Optimum Shift Indicator

Timely gear shifts are one of the most effective and easiest ways to save fuel. This is where Optimum Shift Indicator in conjunction with 6-speed manual transmission comes in. It shows the driver what gear to use in order to save fuel.

Air vent control

Engine management signals the engine's current cooling capacity requirements constantly while driving, rendering a permanent airstream through the radiator unnecessary. The air vents in front of the radiator open or close depending on the environmental temperature and road speed. When shut they improve aerodynamics, shorten the engine's warm-up time and so reduce fuel consumption.

Brake Energy Regeneration

To supply a battery with electrical energy, the generator (alternator) is permanently driven using engine power, which demands additional fuel consumption. Brake Energy Regeneration means the generator usually only generates electricity when the driver either takes the foot off the accelerator or brakes – previously unused kinetic energy is transformed in coasting mode into electrical energy before being fed into the battery. In this way, electricity is generated while coasting, without consuming fuel.

And this is what comes out.

BMW already offers 23 models with CO₂ emissions of 140 g/km and significantly less. But that's just for starters. We're carrying on our research with EfficientDynamics – in the quest to bring you more driving pleasure and less emissions.

Some BMW EfficientDynamics features are dependent on the car's equipment and are not available for all model variants. Your BMW partner will be happy to provide you with information on all equipment details.

■ Standard equipment □ Optional equipment

■ **Headlight washing system** for optimal illumination of the road in all weather conditions. Headlights are automatically cleaned in parallel with the windscreen when the lights are on.

■ **White direction indicators** are an attractive detail, adding to the sporting appearance of the BMW 6 Series.

■ **Side indicator lights** lend the profile a note of individuality.

■ **Fog lights** built into the front air dam, improving safety in poor visibility conditions. Ellipsoid freeform technology enables very even illumination of the road.

■ **Xenon Headlights for high and low beam**, with automatic headlight range control, significantly improve road illumination at night, in bad weather or poor visibility. In combination with the optional **Adaptive Headlights with variable light distribution**, they illuminate bends via electro-mechanical movement of the headlights when the driver turns the steering wheel.
□ **High-beam assistant** aids the driver at night by automatically dimming the headlights for oncoming traffic, when approaching vehicles up ahead, and in the presence of sufficient street lighting.

■ **Brake Force Display** helps following drivers to judge your braking situation. Under light braking, the lower three rows of LEDs in the rear light units illuminate in red, along with the light guide strips of the rear lights whenever driving lights are not in use. Under full braking force, the upper two rows of LEDs also illuminate, generating especially bright braking light.

■ **Door handles** in body colour.
□ **Soft Close Automatic system** gently closes both doors, using an electric motor.

■ Standard equipment □ Optional equipment

□ **Glass roof**, with electrically operated lift function and sun shade, and comfort opening / closing via tip keys.

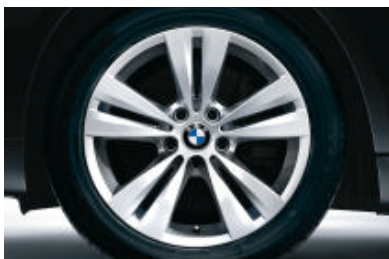

□ **Shadow Line, high-gloss**. The BMW 6 Series Coupé: surrounds the edging of the side windows in the front and rear, the window recess finishers, the windscreen washer jets as well as the mirror base and attachment in Black high-gloss. The BMW 6 Series Convertible: surrounds the window recess finishers, the windscreen washer jets as well as the mirror base and attachment in Black high-gloss.

■ **BMW light-alloy wheels** star-spoke styling 117 with runflat tyres, 7.5 J x 17" wheels, 245/50 R 17 tyres (standard on the 630i and 635d).

□ **BMW light-alloy wheels** V-spoke styling 248 with runflat tyres, 8 J x 18" wheels, 245/45 R 18 tyres (standard on the 650i).

□ **BMW light-alloy wheels** double-spoke styling 266 with mixed runflat tyres, 8 J x 18" wheels with 245/45 R 18 tyres at the front, 9 J x 18" wheels with 275/40 R 18 tyres at the rear.

□ **BMW light-alloy wheels** ellipsoid styling 121 with mixed runflat tyres, 8.5 J x 19" wheels with 245/40 R 19 tyres at the front, 9 J x 19" wheels with 275/35 R 19 tyres at the rear.

□ **BMW light-alloy wheels** star-spoke styling 249, forged and polished, with mixed runflat tyres, 8.5 J x 19" wheels with 245/40 R 19 tyres at the front, 9 J x 19" wheels with 275/35 R 19 tyres at the rear.

□ **BMW light-alloy wheels** styling 218 with mixed runflat tyres, 8.5 J x 19" wheels with 245/40 R 19 tyres at the front, 9 J x 19" wheels with 275/35 R 19 tyres at the rear.

■ Standard equipment □ Optional equipment

■ **Sports leather steering wheel**, three spokes, with multifunction; the driver can operate radio, CD player and telephone (optional) via integrated buttons – keeping both hands safely on the steering wheel.

□ **M leather steering wheel**, rim designed for optimal grip, three spokes, with multifunction; the driver can operate radio, CD player and telephone (optional) via integrated buttons – keeping both hands safely on the steering wheel.

■ **Automatic air conditioning with extra features**, including Automatic Air Recirculation (AAR), solar and condensation sensors, automatic temperature control, air distribution (separate for driver and passenger) and airflow control. Settings shown on Control Display.

■ **Controller**, the core element of iDrive (for driver and front passenger), is a rotary/push button for controlling a multitude of functions via the Control Display. The new direct menu control buttons open the menu for the CD, radio, navigation system* and telephone; tactile design ensures each key can be identified through touch alone.

■ **Functional bookmarks**: Each button can be programmed to instantly activate any commonly-used function of the navigation, audio or telephone systems, (e.g. a radio station or a CD title), enabling the driver and front passenger to access eight favourite functions with ease.

■ **Control Display** with 6.5-inch colour display. Displays functions selected by the Controller (e.g. on-board computer or radio). Screen size is 8.8-inch in combination with Navigation system Professional*.

□ **Navigation system Professional*** with high-definition 8.8-inch colour display, including radio Professional and hard disk storage for audio and navigation data. Directions are provided by the voice computer, arrows or on the map display. Splitscreen function enables division of the display.

□ **Navigation system Professional** with integrated Bluetooth mobile phone preparation for the use of Telematics Services*.

* Not available in all countries. Please consult your BMW partner.

■ Standard equipment □ Optional equipment

□ **BMW Night Vision** uses an infrared camera to detect people and animals beyond the scope of the headlights at a distance of up to 300 metres. The camera's image appears in the Control Display, enabling you to avoid danger in good time on poorly lit roads.

□ **Park Distance Control (PDC)**, front and rear, aids parking and manoeuvring in tight spaces. The proximity of obstacles is indicated acoustically and visually in the Control Display.

□ **TV function** enables the reception of analogue and digital television via the 8.8-inch Control Display when the car is stationary. Can receive terrestrially broadcast and digital (DVB-T) transmissions.

■ **Radio BMW Business**, 6 channel amplifier, diversity function aerial, scan function, CD player.
□ **Radio BMW Professional**, features as Radio BMW Business plus dual-tuner reception and MP3 decoder.
□ **DAB tuner** for receiving digital radio programmes.

■ **CD player**, features include title scan and power-assisted CD insert/eject (shown here in combination with Navigation system Professional).
□ **CD changer** for six CDs, built into glove compartment.

□ **USB/Audio interface** under the front arm rest for connecting compatible audio sources to the sound system, such as an iPod.
■ **AUX-IN connection** for an external audio source, e.g. an MP3 player.

■ **HiFi loudspeaker system** with eight speakers for brilliant sound.
□ **HiFi system Professional LOGIC7** provides an enormously rich, intense acoustic experience, with 13 loudspeakers (11 in the Convertible) creating a near-perfect soundstage. The central bass concept allows for highly authentic reproduction of bass frequencies via sill-mounted subwoofers.
□ **BMW Individual High-End Audio System** features 16 extraordinary high-performance speakers (12 in the Convertible) with exclusive neodymium magnet drives that create an acoustic experience comparable to a live concert. Volume and equaliser settings adjust automatically to the vehicle speed.

■ Standard equipment □ Optional equipment

■ **6-speed manual transmission** makes for extremely dynamic driving. It provides perfectly spaced ratios and light, precise short-throw operation. The close matching of six ratios allows you to make excellent use of the engine's sporty character in your own driving style.

□ **6-speed sports automatic transmission** offers a particularly sporting transmission character with faster gearshifts for an even more dynamic driving experience; gearshift paddles are mounted on the sports leather steering wheel. (Standard for 635d)

■ **Dynamic Driving Control (sport mode)**, at the touch of a button, engine response to the accelerator becomes even more spontaneous. In models with sports automatic transmission shift times are shorter and up-shifting is delayed for a more sporty driving style. Steering assistance is also reduced for improved feel of the road.

■ **Cruise Control with braking function** lets you store and maintain a chosen speed above approx. 30 km/h (activated by left-hand control stalk on the steering column). After accelerating, the pre-selected speed is automatically resumed.

■ **Info Display** with precise, anti-glare analogue instruments. Information such as time, exterior temperature and trip mileage can be selected at any time on LC displays in the instrument panel.

□ **Active Cruise Control with Stop&Go function.** Driving assistance system for increased comfort and active safety in particular for driving in slow-moving traffic. Combines Cruise Control with active safe distance control to a stand-still in bumper-to-bumper driving, with automatic restart in typical „stop and go“ situations.

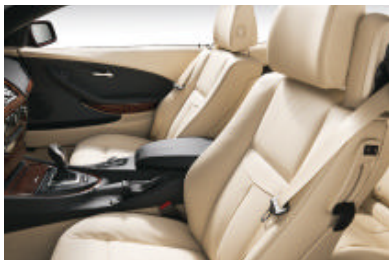

□ The **Lane Departure Warning system** uses a camera to monitor when the vehicle is approaching lane markings, and immediately warns the driver via a steering wheel vibration. The system is designed for country roads and motorways, and is switched on and off with a button in the multifunction steering wheel.

□ **Head-up Display** conveys important information such as current speed directly in the driver's field of vision. Direction arrows from the navigation system, Active Cruise Control functions and Check Control data can also be displayed.

■ Standard equipment

□ Optional equipment

■ **Standard seats with electric seat adjustment and memory function for driver's seat** (BMW 6 Series Convertible with Exclusive Pearl leather upholstery depicted above) with electric adjustment for length, height, backrest angle and tilt control.

□ **Sports seats for driver and front passenger, incl. memory function for driver's seat** (the BMW 6 Series Convertible with Dakota leather upholstery shown here). Pronounced side bolsters ensure optimal lateral support in all driving conditions. Electric adjustment of height, length, backrest angle and tilt control. Thigh support manually adjustable. With lumbar support as standard.

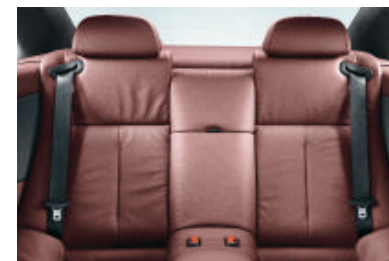

□ **Seat heating**, for driver and front passenger. With heated cushion and backrest, providing comfortable warmth quickly after beginning the journey (standard on 650i).

■ **Electric seat adjustment** for driver and front passenger. Electric adjustment of backrest, cushion (incl. driver seat memory), exterior mirrors, steering column and automatic tilt-down for passenger exterior side mirror.

□ **Lumbar support** for driver and front passenger seats, electrically adjustable vertically and horizontally, for an ergonomically sound seating position and added back muscle support.

■ **Rear seat bench** (the BMW 6 Series Coupé depicted above) with two individually formed seats and ergonomic belt system. With centre-mounted buckles, two three-point belts and head restraints (incl. ISOFIX child seat mounting).

■ Standard equipment □ Optional equipment

■ **Front armrest**, two height positions, including storage bin (shown here) for small items. (Storage bin located under telephone unit when combined with mobile phone preparation).

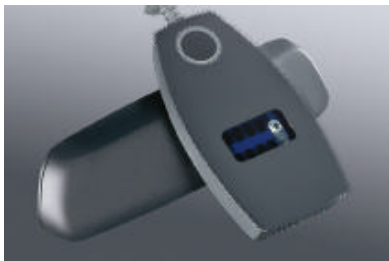

■ **Storage compartment** in rear centre console, hinged.

□ **Mobile phone preparation with Bluetooth interface** (incl. hands-free facility, charger connection and aerial). A Bluetooth-compatible phone can be connected using a snap-in adapter (separately available), allowing control via the multifunction steering wheel and voice control system. Your local BMW partner will be happy to advise on recommended telephones.

□ **Cupholder (front)**, can be removed and stored in the rear centre console storage bin. Includes an additional rear cup holder.

■ **Rain sensor**, incl. automatic driving lights control. When activated, the rain sensor engages windscreen wipers automatically and controls their frequency. Headlights are switched on automatically at low beam when it starts getting dark.

■ **Interior mirror** with automatic anti-glare function. Automatically dims when exposed to more than a given light intensity from following cars.
□ **Interior and exterior mirrors with automatic anti-glare** function and exterior mirrors with fold-in function.

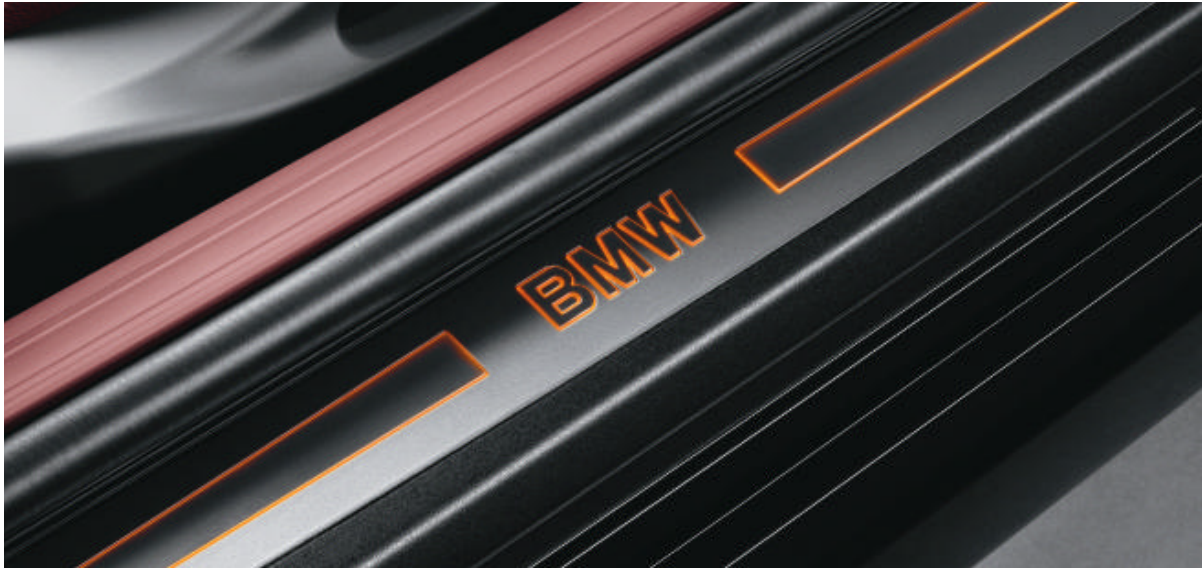

□ **Garage door opener** for additional comfort. The self-learning remote control enables you to open and close your garage door or driveway gate directly from the car.

□ **Comfort access** for locking/unlocking vehicle doors without the need to handle the remote control. Simply keep the ignition key in your pocket, briefcase or handbag. What's more, the engine can be started up without the key via the start/stop button.

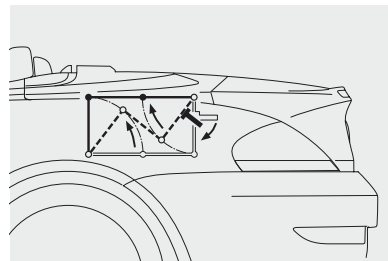

■ Standard equipment □ Optional equipment

□ **Lights package**, incl. vicinity lighting in the exterior mirrors, entry strips with illuminated BMW logo, map compartment light and illuminated door handles.

■ **Luggage compartment** (BMW 6 Series Coupé depicted above), fully lined and easily accessible. Offers space for two 46-inch golf bags and further baggage, incl. four lashing eyelets. Side bins for safe storage of smaller items.

■ **Soft top compartment, variable:** can be effortlessly raised or lowered with one hand using the integrated swivel handle. The advantage: a special folding mechanism folds the soft top compartment flat, for optimisation of luggage compartment volume. When lowered, the compartment stores the soft top.

■ **Luggage compartment, with soft-top compartment raised:** When the soft-top is closed the soft-top compartment is not required and can be easily moved forwards and raised with one hand. The spacious and easily-accessible boot is thus fully available for luggage.

■ **Luggage compartment, fully lined with textile lining, with integrated soft top compartment (lowered).**

■ Standard equipment □ Optional equipment

■ **Fin roof**, fully-automatic. Sets unprecedented standards in noise insulation. In connection with the retractable rear window, it offers very effective ventilation of the vehicle interior. When closed, it gives the convertible a typical coupé-like silhouette; when opened, it is stowed in the soft top compartment fitted in the luggage compartment. Available in grey or black.

■ **Fully-automatic roof operation:** the open/close function occurs automatically at the touch of a button (when vehicle is stationary). The vertical rear window can be retracted independently of the soft top. The soft top can also be opened comfortably via the radio remote control.

■ **Glass rear window**, vertically retractable, can be raised and lowered independently of the soft top. When the roof is closed and the rear window is lowered, the interior is effectively ventilated for a pleasant climate. When the roof is open, the raised rear window improves the comfort of rear seat passengers.

□ **Wind deflector** makes open-top driving more pleasurable by reducing irritating drafts and annoying isolated turbulence in the shoulder and neck region. The wind deflector is easy to operate and can be stowed away compactly in the luggage compartment.

■ **Comfort entry:** seat backs are released easily with one hand. The whole seat then glides forwards for effortless entry and exit.

■ **Seat-integrated belt system** for the BMW 6 Series Convertible provides optimal passenger protection and ideal seatbelt ergonomics in every position.

□ **Ski bag** enables up to two pairs of skis or one snowboard to be transported even when every seat is occupied. When not needed, the ski bag is stored in the centre armrest, out of sight.

□ **BMW Welt:** Taking delivery of a car has always ranked among the best moments for any car driver. Now that moment can become a truly unforgettable day – at the new BMW Welt, the experience and delivery centre in Munich, Germany. Visit the Museum, tour the plant or explore the Technology studio: BMW Welt brings you the true fascination of BMW. Experience more online at www.bmw-welt.com.

■ Standard equipment

□ Optional equipment

Sports seats for driver and front passenger with memory function for driver's seat feature pronounced side bolsters for excellent lateral support in every driving situation; seat height, cushion angle, backrest angle and fore-and-aft position are all individually power-adjustable. The thigh support is manually adjustable. Lumbar support is standard in connection with the M leather steering wheel, the perfect combination of dynamics and comfort.

Exhaust tailpipes in dark chrome for an even more assertive sporting character. The BMW 650i Coupé and Convertible are also equipped with an exhaust system distinguished by a unique sound.

BMW light-alloy wheel double-spoke 288 with mixed runflat tyres, 8.5 J x 19" wheels with 245/40 R 19 tyres at the front, 9 J x 19" wheels with 275/35 R 19 tyres at the rear.

□ **Sports package:** The contours of the bonnet and the large 19-inch BMW double-spoke 288 light-alloy wheels with mixed tyres emphasise the sporting character of the BMW 6 Series Coupé and Convertible. This arresting appearance is perfectly accentuated by the low-set M sports suspension and the Individual Shadow Line, high-gloss. Exclusive to the sports package: Imola Red and Carbon Black, both BMW M paint finishes, plus five other choices of exterior colours. Inside the cabin, sports seats in Dakota leather, the M leather steering wheel and the brushed Aluminium interior trim create a dynamic atmosphere. The roofliner in Anthracite and the lights package complete this exclusive ensemble.

¹ Figures are based on a 90 % tank filling, driver's weight of 68 kg and 7 kg of luggage. Unladen weight applies to vehicles with standard equipment. Optional extras may increase these figures.

² Engines are designed for RON 98 fuel. They may be run on lower grades (min RON 91) fuel with a possible decrease in engine output.

³ Engines conform to the EU4 emissions standard. Fuel consumption is determined according to the ECE combined driving cycle in which approx. one third of the distance covered is in urban traffic and two thirds are extra-urban driving. CO₂ emissions are measured in addition to fuel consumption.

⁴ Electronically limited.

⁵ Standard with 6-speed sports automatic transmission.

Figures in [] apply to models with 6-speed sports automatic transmission.

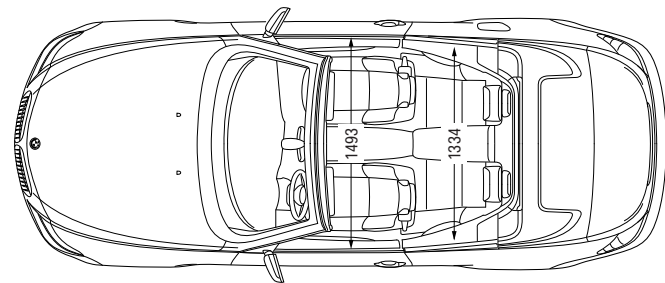

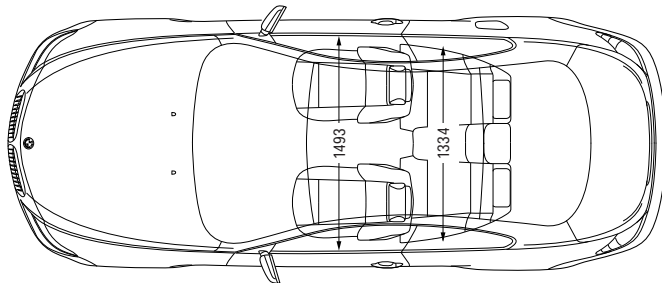

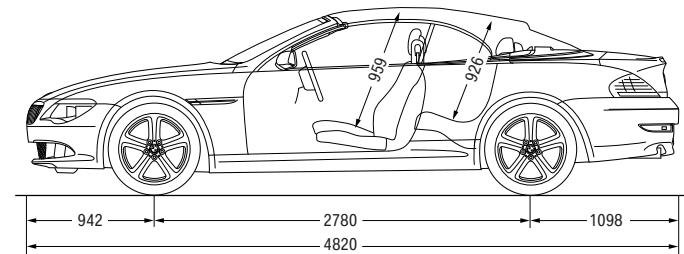

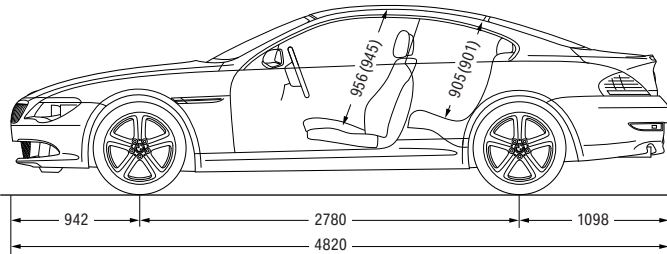

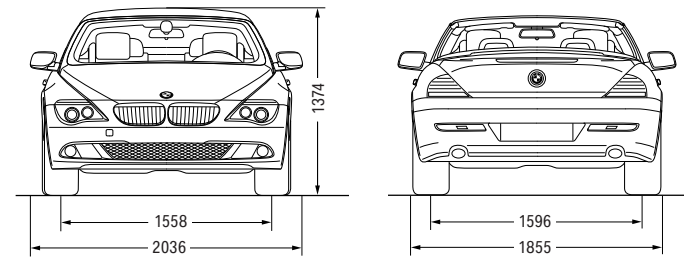

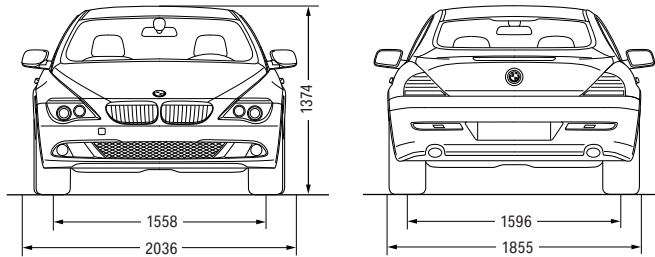

BMW Recycling.

Your BMW is the product of a comprehensive recycling concept. But what exactly does that mean in practice? It means that all the requirements of recycling are taken into account from the start, in the initial development of a BMW. One example is the choice of materials carefully selected to preserve resources and ensure efficient recycling compatible with the environment. Each BMW is designed and built for simple and economic recycling after its running life. We have been collecting the know-how required for this purpose ever since 1994 at the unique BMW Recycling and Dismantling Centre (RDC) near Munich. At the same time the BMW Group is establishing a complete network of vehicle return and recycling facilities initially throughout Europe, focusing in the process on the highest standards of quality and environmental care typical of BMW. So please contact your BMW partner on all matters regarding the return of your end-of-life vehicle. He will be happy to advise you.

The models illustrated in this brochure show the specifications for the German market. In part, they include optional equipment and accessories not fitted as standard. According to the specific legal requirements of other markets, alterations in models, standard and optional equipment, as described in this brochure, may occur. For precise information on model features and the exact level of equipment, please contact your BMW partner or subsidiary. Subject to change in design and equipment.
