<sup>1</sup> The figure quoted includes a 90 per cent tank filling, 68 kg for the driver and 7 kg for luggage. Unladen weight applies to vehicles with standard specification. Optional equipment may increase this figure.

<sup>2</sup> The petrol engines are designed for RON 98 fuel. They may also be run on RON 91 with a decrease in power output.

<sup>3</sup> All engines meet the EU4 (N1) emissions standard. The X5 3.0d and 3.0sd comply with emission standard EU4 (N1-G3). Fuel consumption is determined in accordance with the ECE driving cycle made up of approximately one third urban and two thirds extra-urban driving (based on the distance covered). CO<sub>2</sub> emissions are measured in addition to fuel consumption. Fuel consumption is determined for vehicles with standard equipment. Optional equipment (such as wider tyres) can have a significant impact on fuel consumption and on performance.

<sup>4</sup> Increased trailer load in conjunction with optional equipment.

The BMW X5 4.8i shown in this brochure has the exterior colour Space Grey metallic. The upholstery is in Exclusive Nappa leather Beige, extended coverage, with interior trim in fine wood Burr Walnut.

All dimensions of the technical drawings in millimetres. Luggage compartment capacity (VDA method) 620 –1750 litres.  
<sup>1</sup>Width with folded-in exterior mirrors. Values in ( ) are for vehicles with a panoramic glass roof.

### BMW Recycling.

Your BMW is the product of a comprehensive recycling concept. But what exactly does that mean in practice? It means that all the requirements of recycling are taken into account from the start, in the initial development of a BMW. One example is careful material selection designed to preserve resources and to ensure efficient recycling compatible with the environment. Each BMW is designed and built for simple and economic recycling after its long running life. Since 1994, we have been collecting the know-how required for this purpose at the unique BMW Recycling and Dismantling Centre (RDC) near Munich. At the same time, the BMW Group is establishing a complete network of vehicle recycling facilities within Europe, focusing in the process on the high standards of quality and environmental care that BMW is renowned for. Please contact your BMW partner on all matters regarding your end-of-life vehicle. He will be happy to help.

The models illustrated in this brochure show the specifications for the German market. In part, they include optional equipment and accessories not fitted as standard. According to the specific requirements of other markets, alterations in models, standard and optional equipment, as described in this brochure, may occur. For precise information please contact your local dealership. Subject to change in design and equipment.
