Many forces are at work
in a bend. The greatest
bears the letter "M".

The cockpit has one central instrument. Your intuition.

An “M” says more than a thousand words.

1. Door sill trim with M logo.
2. Info Display with white-illuminated speedometer and rev counter scales with variable pre-warning field and red-illuminated needles.
3. M light-alloy wheels: double-spoke 224 M.
4. Two dual tailpipes in chromed stainless steel.
5. Illuminated gear lever.
6. Multifunction M leather steering wheel.

BMW Recycling.

Your BMW is the product of a comprehensive recycling concept. But what exactly does that mean in practice? It means that all the requirements of recycling are taken into account from the start, in the initial development of a BMW. One example is the choice of materials carefully selected to preserve resources and ensure efficient recycling compatible with the environment. Each BMW is designed and built for simple and economic recycling after its long running life. We have been collecting the know-how required for this purpose ever since 1994 at the unique BMW Recycling and Dismantling Centre (RDC) near Munich. Please contact your BMW partner on all matters regarding your end-of-life vehicle, who will be happy to advise you.

The models illustrated in this brochure show the specifications for the German market. In part, they include optional equipment and accessories not fitted as standard. According to the specific requirements of other markets, alterations in models, standard and optional equipment, as described in this brochure, may occur. For precise information on model features and the exact level of equipment, please contact your BMW partner. Subject to change in design and equipment.

BMW Z4 M Roadster

BMW Z4 M Coupé

All dimensions in the technical drawings are given in millimetres. Luggage capacity up to 200 – 220 litres on the BMW Z4 M Roadster and 245 – 300 litres on the BMW Z4 M Coupé (VDA measurement).

¹ Figures are based on a 90% fill-up, driver's weight of 68 kg and 7 kg of luggage. Unladen weight applies to vehicles with standard equipment. Optional extras may increase these figures.

² Engine designed for use with RON 98 fuel. Use of RON 95 fuel may result in reduced engine output.

³ Engine conforms to the EU4 emission standard. Fuel consumption is determined according to the ECE combined driving cycle in which approx one third of the distance covered is in urban traffic and two thirds are extra-urban driving. CO₂ emissions are measured in addition to fuel consumption.

⁴ Electronically limited.
