

ALL-NEW 2009

# DODGE CHALLENGER

GET IN. YOU WON'T WANT TO GET OUT.

Challenger SRT8<sup>®</sup>

Challenger SE

Challenger R/T

With the push of a button a legend is born and an entire segment is reinvigorated. This is the all-new Dodge Challenger. This is not some white-knuckle carnival ride, but a thoroughly modern piece of engineering that marries pure power with measured control. Its lean, low profile is already legendary, simultaneously celebrating the past as well as the future – a massive helping of forward thinking topped with a dollop of heritage. From its efficient 3.5-liter SOHC V6 engine to its smart, available 5.7-liter HEMI<sup>®</sup> V8 engine with Multi-Displacement System (MDS)<sup>†††</sup> to its unmatchable Lifetime Powertrain Limited Warranty – the best in the business – the all-new 2009 Dodge Challenger is unlike any other. **LIFETIME**

MSRP. Excludes destination, tax, license and title. ††† See dealer for details. ©2008 Chrysler Group LLC. All rights reserved. Dodge, Challenger, and Challenger R/T are trademarks of Chrysler Group LLC. All other trademarks are the property of their respective owners.

# HEMISTRY

Some might say that engines like the 5.7-liter VVT HEMI® V8 and 6.1-liter HEMI SRT® V8 – power plants that put out more horsepower and torque than any Dodge passenger car since the fabled 426 Hemi engines of the 1960s and 1970s – have already set their legend in stone. Chrysler engineers would disagree. They took the brilliantly powerful and masterfully efficient 5.7-liter with Multi-Displacement System (MDS)<sup>SM</sup> and outfitted it with Variable Valve Timing (VVT) while cranking the compression up to 10.5:1. It began as code name Eagle. It ended up with a new and improved dual-ignition HEMI engine that delivers 370 horsepower and 398 lb-ft of torque with the 5-speed automatic AutoStick<sup>SM</sup> while the available 6-speed manual transmission increases output to 375 horsepower and a whopping 404 lb-ft of torque – 30-35 more horsepower. Paired with AutoStick<sup>SM</sup> the HEMI MDS system uses sophisticated algorithms to seamlessly transition from eight cylinders to four when full power is not required, providing four percent better fuel mileage. The 6.1-liter SRT HEMI V8<sup>SM</sup> sends a corralled stampede of 425 horses straight to the rear wheels. Its throwback Hemi Orange engine block is a nod to where HEMI has been; the updated titanium components within signal where HEMI is going.

## HEMI

**6.1-LITER SRT HEMI V8:** Its 69.8 horsepower-per-liter rating exceeds that of any vehicle ever offered by Chrysler. It puts out 425 horsepower and 420 lb-ft of torque thanks to bored-out cylinders, high-flow heads, SRT specific intake and exhaust manifolds and beefed-up valves that respond to a performance-minded camshaft. It's only fitting that the reinforced block under the hood of Challenger SRT8<sup>SM</sup> is clad in Hemi Orange from the original paint code.

**5.7-LITER VVT HEMI V8 WITH MDS (AUTO TRANSMISSION):** Its aluminum cylinder heads are milled with hemispherical combustion chambers that benefit airflow and, subsequently, horsepower and torque. The now and improved 5.7-liter VVT HEMI features Variable Valve Timing (VVT) for improved torque over an extended rpm powerband. When equipped with MDS, the computer-controlled variables all add up to improved mileage.

MDS (paired with AutoStick transmission)

## REAR-WHEEL DRIVE. FORWARD THINKING.

Horsepower without control is nothing but a wick in a keg of gunpowder. Challenger's driveline is a variable cruise missile of advanced control. Challenger's independent 5-link rear suspension is tuned to provide improved ride comfort and superior handling on rough roads, thanks to lower unsprung mass which helps maintain better tire contact with the ground and reduces rear road noise. It is further tuned for the SRT<sup>®</sup> and features a performance-tuned suspension with Bilstein<sup>®</sup> monotube fused dampers. From its specially sprung rear rails and suspension bushings to its beefy sway bars, Challenger SRTB knows how to put the muscle to the pavement. Anti-tilt rear differential<sup>†</sup> Standard. Electronic Stability Program (ESP)<sup>††</sup> Standard, complete with roll-off mode, brake knock-back mitigation all sizes a lateral g-force sensor to prime the anti-lock braking system (ABS) pump and reset the pads for less brake travel when cornering. Alongside this system, SRTB's massive 4-piston Brembo<sup>®</sup> Performance calipers and brakes with vented rotors provide nothing less than world-class stopping power. The SRT Rec configurable Display provides performance data on 0-60 times, ¼-mile times, ½-mile times and track lap times.

\*The system, an active rear suspension, can adjust the level of support in various corners during cornering. Performance is limited by available traction, which varies by wind and other conditions and affects driver. The ESP system can adjust the level of support in various corners during cornering. Performance is limited by available traction, which varies by wind and other conditions and affects driver. The ESP system can adjust the level of support in various corners during cornering. Performance is limited by available traction, which varies by wind and other conditions and affects driver.

## BEHOLD THE BUCKETS.

It returns to the scene as the only vehicle in its class<sup>1</sup> to offer five-passenger seating. Within these well-bolstered confines lies 40 years of interior tech: fit by available LED cup holders and bathed by courtesy lights. The interior features leather-trimmed bucket seats (available on R/T and SE, standard on SRT®), available heated seats and an eight-way power driver's seat with power recline. The rear seating delivers serious space and provides belted seating for three passengers with a standard fold-down armrest and cup holders. Challenger's EZ-access seat system allows for one-handed entry without the inconvenience of contortion. The 60/40 split-folding feature reveals an equally accommodating trunk for flexibility that's anything but throwback. The spirit of reinvention continues with an available sunroof, an available pistol grip shifter and a steering wheel featuring available integrated audio controls, while Challenger's "Four Bomb" gauges and available race-inspired pedals nod to the original. The SRT® only 180-mph speed is for closed courses when you unleash the muscle.

<sup>1</sup>Based on North North Specialty segment.

# HEMISTRY

Some might say that engines like the 5.7-liter V<sup>T</sup> HEMI<sup>®</sup> V8 and 6.1-liter HEMI SRT<sup>™</sup> V8 – power plants that put out more horsepower and torque than any Dodge passenger car since the fabled 426 Hemi engines of the 1960s and 1970s – have already set their legend in stone. Chrysler engineers would disagree. They took the brilliantly powerful and masterfully efficient 5.7-liter with Multi-Displacement System (MDS)<sup>1</sup> and outfitted it with Variable Valve Timing (VVT) while cranking the compression up to 10.5:1. It began as code name Eagle. It ended up with a new and improved dual-ignition HEMI engine that delivers 370 horsepower and 398 lb-ft of torque with the 5-speed automatic AutoStick<sup>®</sup> while the available 6-speed manual transmission increases output to 375 horsepower and a whopping 404 lb-ft of torque – 30-35 more horsepower. Paired with AutoStick<sup>®</sup> the HEMI MDS system uses sophisticated algorithms to seamlessly transition from eight cylinders to four when full power is not required, providing four percent better fuel mileage. The 6.1-liter SRT HEMI V8<sup>®</sup> sends a corralled stampede of 420 horses straight to the rear wheels. Its throwback Hemi Orange engine block is a nod to where HEMI has been; the updated titanium components within signal where HEMI is going.

## HEMI

**6.1-LITER SRT HEMI V8:** Its 69.8 horsepower-per-liter rating exceeds that of any vehicle ever offered by Chrysler. It puts out 425 horsepower and 420 lb-ft of torque thanks to bored-out cylinders, high-flow heads, SRT specific intake and exhaust manifolds and beveled-up valves that respond to a performance-minded camshaft. It's only fitting that the reinforced block under the hood of Challenger SRT<sup>™</sup> is clad in Hemi Orange from the original paint code.

**5.7-LITER VVT HEMI V8 WITH MDS (AUTO TRANSMISSION):** Its aluminum cylinder heads are milled with hemispherical combustion chambers that benefit airflow and, subsequently, horsepower and torque. ## TUNE IN. TURN ON. TECH OUT.

The ribbed seatbacks. The available pistol grip shifter. You practically expect to see sideburns in the rearview mirror. Instead, the biggest advance in car audio since the CD player promises to turn the interior of Challenger into an integrated digital playground. The available uconnect™<sup>1</sup> has a 30 GB hard drive that lets you store photos, playlists, maps, and points of interest, as well as rip, stash, organize and shuffle up to 4,100 music files from CDs or via the USB port and exterior input jack (complete with Gracenote® for easy song titling). uconnect™ operates by touch screen and accepts commands through its integrated microphone for the uconnect phone, allowing for voice tag dialing and verbal access to the onboard phonebook, as well as playlists and a voice recorder. Behind this 6.5-inch integrated touch screen lies a CD/DVD/MP3 player that also reads DVD video, all while providing GPS navigation and real-time traffic via a SIRIUS® Satellite Radio tuner.

\*The 30 GB capacity is not available in all states. See your dealer for details.

## FROM A FAMILY OF KINGS.

Challenger SE's standard 3.0-liter SOHC V6 has enough power to pin you to its low-back cloth bucket seats. It features an aluminum block with cast-iron liners and four-valve per cylinder aluminum heads, its sophisticated electronic throttle control system (allows throttle response to pedal movement based on operating conditions for that rarest combination of efficiency (24 mpg highway<sup>1</sup>) and muscle (250 hp @ 6400 rpm). Even the ignition system is trick, with platinum-tipped spark plugs that extend scheduled tune-up intervals to 100,000 miles and a coil-on-plug design that helps reduce emissions and increases fuel economy. The four-speed transmission delivers enough spirit to match the SE's sophisticated swagger. Challenger's broad shoulders are framed with a standard chin spoiler, unmistakable performance hood and post-mounted side mirrors. The SE cockpit features standard front bucket seats and a four-bomb instrument cluster with black surrounds and black headliners. Its three-across rear seats put it in rare company — a coupe with five seat belts. Roll with 17-inch machined-face aluminum or available 18-inch aluminum wheels, with other options, including leather trim or sunroof, to give SE anything it takes to stand out in any crowd of Challengers.

<sup>1</sup>Manufacturer's est.

# SAFETY REINVENTED.

We can't have swagger without confidence, and you can't have confidence without true structural integrity. The all-new Challenger is reinforced and reinforced with standard safety and security features. With it you are cradled in a safety cage and surrounded by an advanced multistage air bag system.<sup>11</sup> Fully engineered crumple zones, and high-strength side-guard door beams. Active systems like available Electronic Stability Program (ESP)<sup>12</sup> all-terrain traction control, antilock braking system (ABS) with Brake Assist, and Tire Pressure Monitoring System form a (will)not-behind-the-scenes electronically integrated security network.

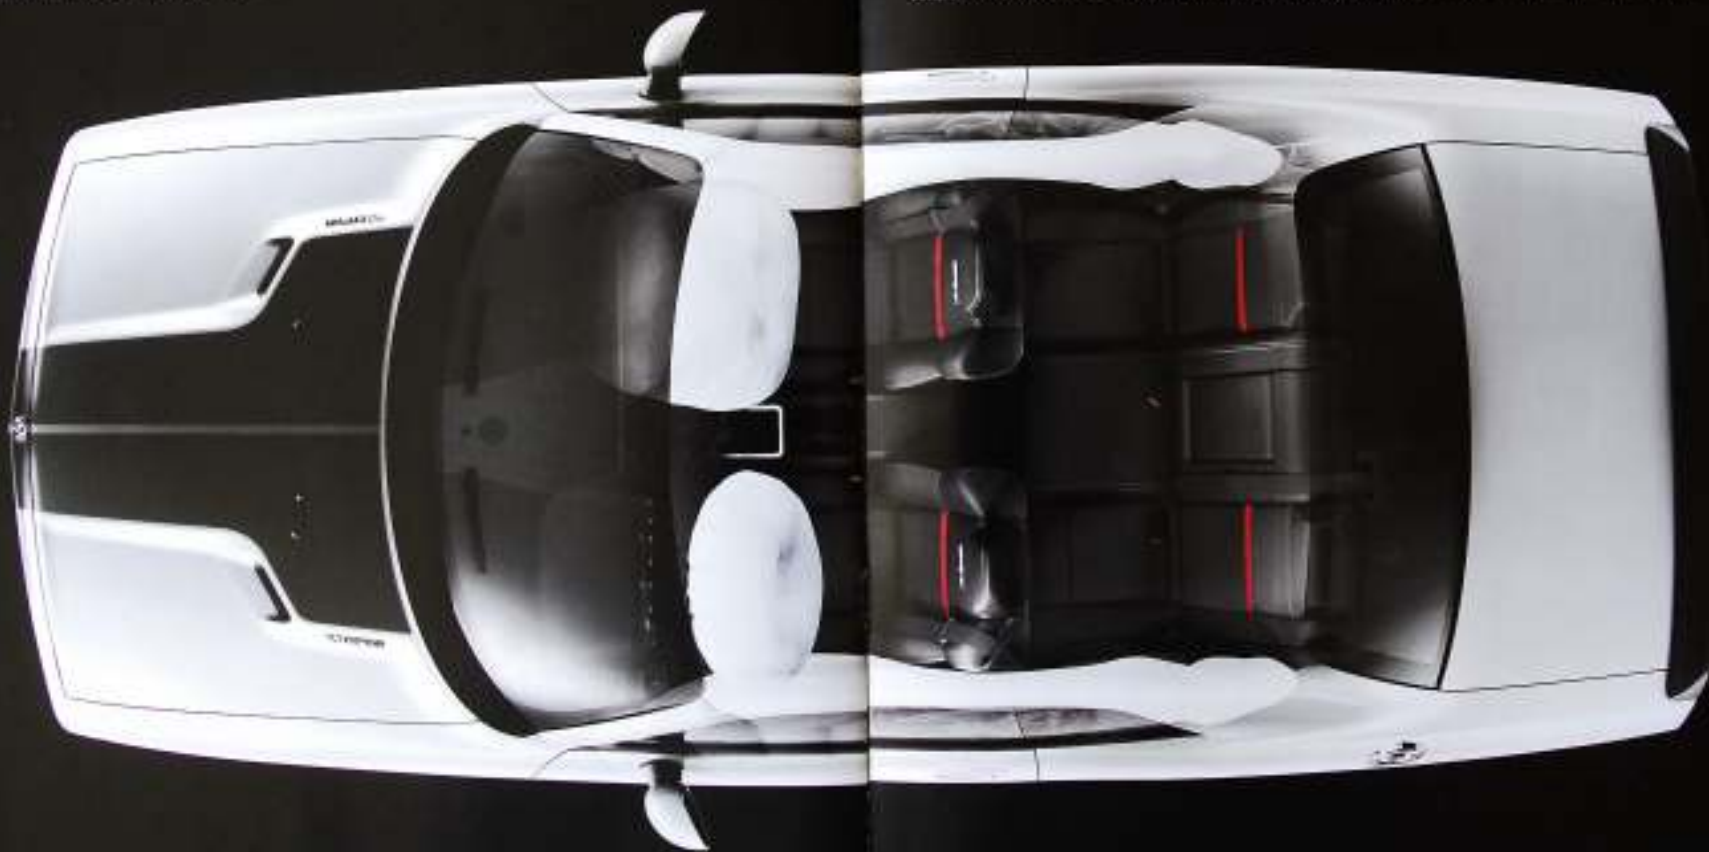

**MULTISTAGE DRIVER FRONT PASSENGER AIR BAG<sup>11</sup>.** Every Challenger provides standard next-generation multistage driver and front passenger air bags that use special inflators to deploy with either low, medium or high force, depending upon the dynamics of the incident.

**STANDARD SIDE-CURTAIN AIR BAG<sup>11</sup>.** The standard side-curtain air bags offer additional side-impact protection for outboard front and rear seat passengers. The deployed curtain covers both windows on the side of the impact.

**SIDE-GUARD DOOR BEAMS.** In the event of an accident, Challenger's structural integrity safeguards its occupants. In addition to extended sill reinforcements, its floors employ a one-piece bake-hardened steel panel with a hot stamped boron steel side door guard beam for improved side impact protection.

**ENERGY-ABSORBING STEERING COLUMN.** The steering column in every Challenger is designed to deform and deflect away from the driver's seat in order to protect the driver in the event of a frontal impact.

<sup>11</sup>Some air bags inflate the seat with the seat belt harness. Children 12 and under should always be buckled correctly every time when using their vehicle. Always use proper air bag seating. <sup>12</sup>The driver is not to be distracted, impaired or the use of electronic devices while driving. Performance is based on manufacturer's rated use. Use of other vehicles and other factors may affect performance. Always use proper driving technique. Always wear your seat belt. Always use your seat belt.

## YOUR OLD SCHOOL COLORS.

Challenger SRT8 shown in Red Orange

Challenger R/T Classic shown in BS Blue

Those looking to offer a tribute to the 1970s' original road look no further than a Challenger R/T Classic<sup>SM</sup> or SRT8<sup>SM</sup> Spring Special<sup>SM</sup> clad exclusively in BS Blue from the Chrysler paint code archives. The R/T Classic's scripted fender badge is a nod to the one that started it all. It features a varied performance hood that increases airflow while cooling the 5.7-liter VVT HEMI<sup>SM</sup> V8. The polished chrome 20-inch Heritage wheels may be right-size in size, but they're pure throwback in style, along with the side-slate stripes. Clad in SRT8 in BS Blue and it will be decked with a performance hood that gives its 6.1-liter HEMI SRT8<sup>SM</sup> V8 engine some breathing room. Like eye black on a fireman's cheekbones or paint on a lion's mane, the SRT8 hood is knocked down in a matte black hood stripe and it's ready for battle. Its interior, however, turns it right back up with blue accents on its performance-tuned seats.

## ATTACK OF THE TRACK PAK.

It lights them up and lays it down, thanks to a TorqueFlite 6-speed manual transmission that's controlled via a pivot grip shifter, a 375-horsepower 5.7-liter WT HEMI® V8 that takes its orders from a bright gas pedal and little switch that lets you tell the Electronic Stability Program (ESP)<sup>®</sup> to take a break for a few minutes. This is the Challenger Track Pak. It features Hill Start Assist to aid the driver when starting from a stop on inclines by holding the brake for approximately one second for an effortless start up any hill. The axle ratio on the 18-inch wheels is 2.73, opt for the 20-inch chrome-clad wheels and you also benefit from an anti-lock four-wheel disc performance braking system (ABS) and a 3.91 axle ratio. The performance steering system is tuned to take the turnoff with a variable displacement pump that counters any fluid slosh during cornering. The performance mind-set continues with a rear axle that features an anti-rattle rear differential. It's fitting that Challenger offers an available retro HEMI wide-body stripe or contemporary hood-to-ender stripe, because there's no doubt that this reinvigorated legend has already earned its stripes.

\*The above information has been prepared for general information only. It does not constitute an offer. Performance is based on standard equipment. Actual results may vary. Always use proper driving techniques. Always wear your seat belt. Always use proper driving techniques. Always wear your seat belt. Always use proper driving techniques. Always wear your seat belt.

## COLOR ME GONE IN ANY TRIM LEVEL.

Rarely does a vehicle fit the scene without sacrifice, without being watered down by the constraints of timing or public opinion. Rarely does a vehicle like Challenger come along, where it makes a raw, unadorned declaration straight from concept to production without a single stutter. It's not often that a car's swagger runs from its beta model to its alpha state, but whether in SE, RT or SRT8<sup>®</sup> trim, the attitude of the all-new Challenger is heard loud and clear. There's no question about the statement, only the color you want to make it in.

I = Included, P = Available within package noted, O = Optional.

<sup>1)</sup>Always sit properly in the seat with the seat belt fastened. Children 12 and under should always sit in a backseat correctly using an infant or child restraint system, or the seat belt positioned correctly for the child's age and weight.

<sup>2)</sup>No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.

GRAB LIFE

DODGE

LIFETIME

dodge.com | 800-4ADODGE | Form no. 74-383-2900 \_ 6/08 (351M) \_ Litho in USA

Dear Harry Straley:

Thank you for inquiring about Dodge Challenger. If it's performance, technology, capability, and safety features you're looking for, you're looking in the right place.

From the redesigned 5.7-liter HEMI® V8 with Variable Valve Timing and the updated Cummins® Turbo Diesel to the earth-friendly Flex Fuel 4.7-liter V8 engine, Dodge cars and trucks offer real fuel economy for today's world without sacrificing performance.

Meanwhile, breakthroughs like the revolutionary uconnect gps system, innovations like industry-first Swivel 'n Go® seating, state-of-the-art safety options, and the eye-catching profiles of our vehicles are literally making headlines around the world. You owe it to yourself to find out more. Grab the Dodge of your choice and take that test-drive at your local dealer. You can check out all of our groundbreaking vehicles at [dodge.com](http://dodge.com).

Thanks again from your friends at Dodge.

Michael Accavitti  
Director, Dodge Brand & SRT Marketing

Cummins is a registered trademark of Cummins, Inc.

You talk. We listen. You demanded a great warranty and we gave you the best in the business — our exclusive Lifetime Powertrain Limited Warranty.<sup>1</sup> It's the first of its kind offered by any automaker and it means you are covered for as long as you own your vehicle.

<sup>1</sup>Excludes the See dealer for a copy of full warranty conditions. Not available on SRT, alternative fuels, and specialty vehicles. Hybrid vehicle components including transmissions, and zero-emission vehicles.
