<sup>2</sup>The 19-inch & 20-inch wheel and tire assembly is of low profile with a bias towards sporting attributes. Wheel and tire assemblies with low tire sidewall height will be more susceptible to impact damage in service.

<sup>3</sup>This vehicle is equipped with an Ultra High performance tire and wheel combination designed to provide maximum dry pavement performance with consideration for hydroplaning resistance. As such, they may be more susceptible to road hazards, and consequential damage. Ultra high performance tires may also be expected to experience increased tread wear with shorter tread life. These tires are not recommended for driving on snow or ice, and should be replaced with winter tires when weather conditions dictate.
