[3] Availability of specific features is dependent upon the phone's Bluetooth® support. Please refer to your phone owner's manual for details. Cell phone not included. The Bluetooth word mark and logos are owned by Bluetooth SIG, Inc., and any use of such marks by Nissan is under license.

[4] The RearView Monitor is a convenience but is not a substitute for proper backing procedures. Always turn and check that it is safe to do so before backing up. The RearView Monitor may not detect every object behind you.

[5] Air bags are only a supplemental restraint system; always wear your seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. Also, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Air bags will only inflate in certain accidents; see your owner's manual for more details.

[6] VDC cannot prevent accidents caused by abrupt steering, carelessness, or dangerous driving techniques. Always drive safely.

[7] Tire Pressure Monitoring System is not a substitute for regular tire pressure checks.

[8] May require additional options or option packages.

[9] Some accessories may require installation, which is not included in the Manufacturer's Suggested Retail Price (MSRP). Retailer sets actual price.

[10] Always give your full attention to driving. Avoid operating your iPod in such a way that you can be distracted during vehicle operation. iPod® charge through the Interface System may only be supported via use of FireWire® devices. See Retailer for details.

[11] Intelligent Brake Assist is not a collision avoidance system. It may not provide warning or braking in certain conditions. Never rely solely on IBA.

3.7-liter V6 engine with 330 hp

The G Coupe's class-leading[1] 330-hp VQ engine includes exclusive VVEL technology that continually tunes valve lift and timing for quicker response and a broader torque curve, even while improving fuel economy and emissions.

[1] Based on WardsAuto.com's Lower Luxury Car class, with MSRP under \$40,000. 2009 G37 Coupe vs. 2008 competitors.

7-speed automatic transmission with Drive Sport (DS) mode

Driver-adaptive algorithm senses driving style and adjusts automotive shifting accordingly. Manual shift offers sequentially selected manual gearshifts and Downshift Rev Matching.

LATCH System (Lower Anchors and Tethers for Children)

Anchor points are located in the rear seating positions where the seatback and seat cushion meet, and a top tether anchor is located on the parcel shelf. They allow the placement of LATCH System-compliant child-restraint seats in the rear seat. LATCH System seats allow installation and secure attachment without the need for ALR seat belts or locking clips.

Electronic Brake force Distribution (EBD)

To help optimize braking performance for a variety of vehicle loads, EBD adjusts the amount of brake force applied to the front and rear wheels for improved braking performance, reduced front-end "dive" under braking and more even brake wear.

Brake Assist (BA)

In emergency situations, many drivers don't brake hard enough, soon enough. Brake Assist monitors how you apply the brakes and, sensing emergency braking, applies maximum brake pressure for potentially shorter stops.

4-wheel Anti-lock Braking System (ABS)

G37 Coupe's large, 4-wheel ventilated disc brakes include a 4-wheel, 4-channel Anti-lock Braking System (ABS) to help the driver maintain steering control while braking.

Vehicle Dynamic Control (VDC)

A change in traction can affect your car's stability during cornering. VDC[1] uses an array of sensors to help determine your steered path and to help keep you in control. If your vehicle begins to understeer (plow forward) or oversteer (fishtail), VDC applies appropriate brake pressure to individual wheels and/or reduces engine output to help keep both ends in line.

[1] VDC cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. Always drive safely.

Traction Control System (TCS)

G37 Coupe's integrated Traction Control System (TCS) senses wheelspin while accelerating and automatically reduces engine output and/or brakes the spinning wheel to help regain traction.

*All prices are Manufacturer's Suggested Retail Price (MSRP). MSRP excludes destination and handling charges, tax, title, license, and options. Retailer sets actual price.
