

# MORGAN MOTOR COMPANY

## MORGAN EVA GT

The Morgan EvaGT, an efficient four-seater coupe aimed at the young sporting family, makes its debut at the 2010 Pebble Beach Concours d'Elegance. Morgan Motor Company has taken its inspiration from the British sports saloons of the early 1950s, including the Bristol 400 series and the Frazer Nash BMW 328.

The EvaGT uses a further developed version of the bonded aluminum chassis of the Morgan Aero SuperSports, a chassis that successfully competes in international GT3 sports car racing, in compliance with European and U.S. safety approvals. It is powered by a BMW 3-litre straight-six mono twin-turbo engine, delivering 306 bhp and 400 nm torque.

Morgan Design has sculpted a new shape for the Morgan EvaGT that focuses on natural materials and understands their

technical properties. After using computer technology in design and in manufacture to ensure accuracy, the parts are then hand finished to make sure they feel as good as they look. A perfect "A" class surface, minimal shut lines, hidden wipers, flush door handles and sharp creases deflect air over the surface of the car.

The new Morgan EvaGT represents a philosophy of lightweight luxury that embraces authenticity, sustainability and innovation, achieving its final result through the process of skilled craftsmanship.

The first 100 cars of a limited run are planned to begin production in mid-2012.
