## FOR IMMEDIATE RELEASE – The first Canadian *Supercar*, the Plethore LC-750, finally presented in Canada.

**MONTREAL, February 2<sup>nd</sup> 2010.** Recently arrived from Scottsdale, Arizona, where the well-known Barrett-Jackson Autoshow took place from January 17<sup>th</sup> to 24<sup>th</sup>, HTT Technologies now announces its presence at the *Canadian International AutoShow* in Toronto from February 12<sup>th</sup> to 21<sup>st</sup>, 2010 ([www.autoshow.ca](http://www.autoshow.ca)).

The first Canadian *Supercar*, the Plethore LC-750, literally stole the show at the Barrett-Jackson Autoshow. The HTT team is naturally extremely satisfied to have signed a few orders but even more so at the public's immense enthusiasm towards their vehicle. The audience devoured the car's every detail down to each curve and line of this new three-seater supercar with central driver position, the Plethore LC-750.

Mr. Sébastien Forest, president of HTT, declared, "Mission Accomplished! The comments were unanimous and it's with great optimism that we start the year 2010. Our presence in Toronto will be the perfect occasion to become known at home in Canada. We are extremely proud to finally present our Plethore to the Canadian public."

The *Canadian International AutoShow* in Toronto is the first Canadian event in which HTT will participate and during which journalists and visitors will be able to admire the first Canadian *Supercar*, the Plethore LC-750.

### 2010: A promising year

Mr. Forest comments, "2010 will be a big year for HTT. We have already pre-sold almost all our first year's production. We will begin assembling in the next few weeks for deliveries in the Fall 2010. We will also make our European entry next April at the *Top Marques Monaco Autoshow*."

The Toronto AutoShow will allow HTT to solidify its roots and demonstrate to the Canadian public that the exotic car market is not reserved exclusively for European manufacturers.

Come meet us from February 12<sup>th</sup> to 21<sup>st</sup>, 2010, at the *Canadian International AutoShow* in Toronto to admire this work of art that has often been compared to a Picasso on 4 wheels.
