

FLY

Fly the new Scorpio mHawk.

It is what happens when you let aircraft enthusiasts have their way with a car. Watch other cars become dots in your rear-view mirror as you unleash the raw power of its spanking new mHawk engine. Be amazed by a new level of intelligence as the car reacts smartly to its environment and your needs. A host of new comfort and technology innovations make sure you don't just zoom across the landscape, you fly.

Other cars will forever play catch up.

Beneath the new Scorpio's hood lies the secret to its power - its modern 2179cc, 4-cylinder, common rail diesel engine - the mHawk.

Unbridled power.

Go from 0 to 60 in 5.7 seconds flat, touch 150 kmph with ease. Discover effortless acceleration with 120 bhp of power and a flat torque of 290 Nm (1800 ~ 2800 rpm). Watch how the slightest tap on the pedal sends other cars struggling to catch up.

All this is possible because the light weight mHawk engine, with its all-aluminium cylinder heads, is tuned for power.

Turbochargers feed concentrated gusts of wind into a Variable Geometry Turbine, a simple yet cunning device that partially closes to trap the air inside at high pressures. This generates tremendous torque even at low speeds. A decrease in gross weight, coupled with a reduction in base engine friction ensures that parasitic losses of power are seriously lowered and acceleration gets even better.

Cool performance.

The sporty bonnet scoop provides a direct passage for air to rush into the mHawk's new top-mounted intercooler. The intercooler in turn directs this air into passages to optimise engine cooling. Which means you get a hot performer that never ran cooler.

Great mileage.

The mHawk keeps a tight leash on how diesel gets burnt. The 2nd generation Bosch Common Rail System with solenoid injectors intelligently manages fuel supply to the engine.

The 4-valves per cylinder fuel spray design ensures that fuel burns better, generating more power from the same amount of fuel. Fuel economy gets even better and emissions are considerably lower.

Unexpectedly quiet.

The mHawk's innovative two-stage chain drive system and hydraulic lash adjuster cut down engine noise levels drastically. Even the ignition system has been tweaked to ensure quieter operation, making this monster deceptively quiet. Now, it's easy to see why other cars get left in the dust.

Music at your fingers.

Switch radio stations or play god with the volume. The conveniently located mode lever lets you shift between tuner, CD/MP3, SD card, USB and auxiliary modes with ease. All this, without ever taking your eyes off the road or hands off the steering wheel.

Cruise effortlessly.

Rest your foot at higher speeds. Push a button and let the Scorpio's Cruise Control take over. It can be engaged once you cross 40 kmph and will go on till any pedal is pressed. Once engaged, you can command a constant speed without any effort and even adjust your cruising speed with the press of a button.

Flat tyres are for others.

Tyre-tronics - It's the kind of early detection system you'll probably find only in airplanes. A sophisticated measuring system that tells you the exact air pressure and temperature of each tyre.

Pressure and temperature sensors located in each tyre constantly send signals to the Electronic Control Unit (ECU). Any undesirable change in either will immediately flash on the instrument cluster so you can attend to it.

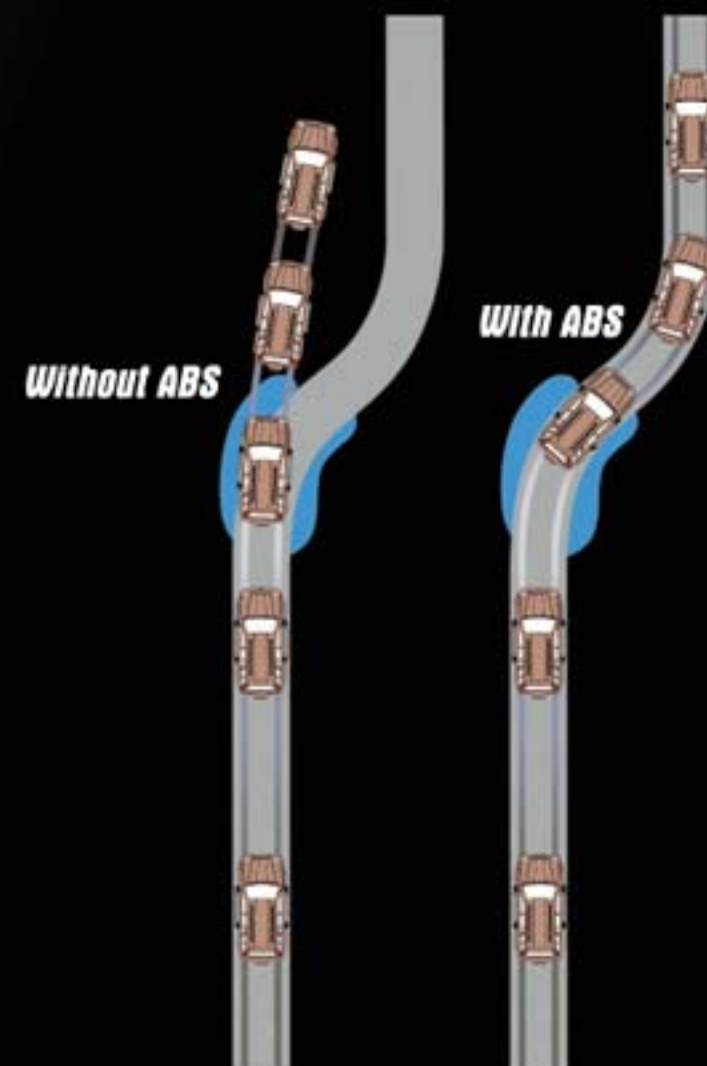

So no more nasty surprises on the road, just a smooth ride.

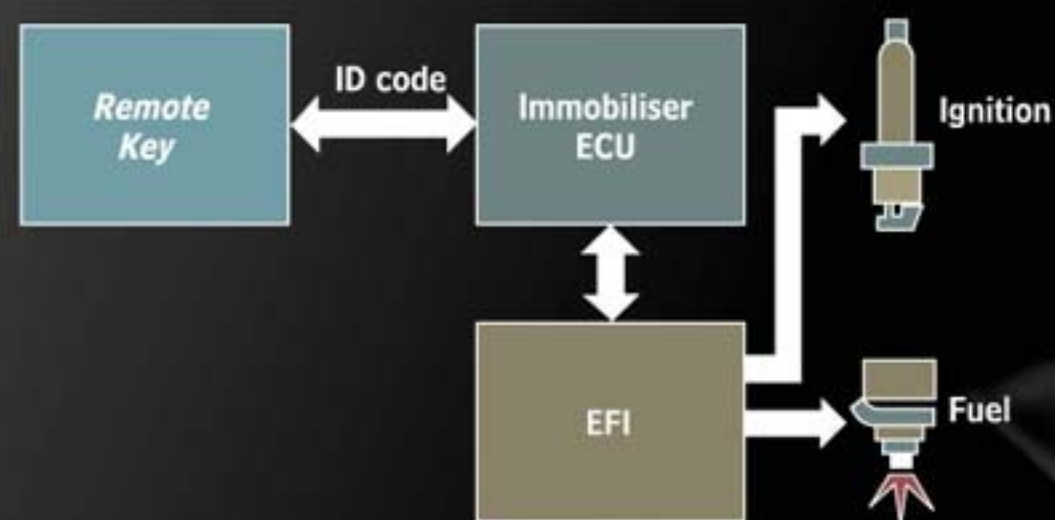

At last, a thinking window.

Driving this car is an experience in intelligence. And this time, it is the Anti-Pinch window on the driver's side. The slightest obstruction to the rolling up of the window stops the action instantly. And then sends the glass back in the downward direction. A simple yet smart device that prevents injury.

Go ahead, brake hard on any slippery surface.

Floor the brakes on any skid-prone surface (snow, water, loose gravel, or even oil) and you will be pleasantly surprised. The wheels won't lock on you. Steering control will be perfectly obedient. And the brakes will behave just like they always did. The Anti-lock Braking System or ABS will make sure peace reigns inside the car, and out.

Makes fools of thieves.

Not just other cars, even thieves will have a tough time figuring out the new Scorpio mHawk. If anyone tries breaking in, the system gets tripped, the immobiliser locks the engine and then cuts off the fuel supply. Let's just say it's really hard for anyone to mess around with this marvel.

***Get used to pointing fingers
and dropped jaws.***

*Exclusive sporty decals and alloy wheels add that extra zing to this show stopper.
Get ready to soak in the admiration as heads turn wherever you go.*
