TRACTION CONTROL SYSTEM (TCS)	✓	✓

[§] Always wear your seatbelt and secure children in the rear seats in appropriate child restraints.

[¶] Dynamic Stability Control (DSC) is an electronic system designed to help the driver maintain control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether DSC will be effective in preventing loss of control. Please see your owner's manual for further details.
