

MCLAREN AUTOMOTIVE

McLAREN 12C SPIDER

The McLaren 12C Spider, the second vehicle in McLaren Automotive's lineup, has the same Formula 1 DNA and benchmark performance credentials as the 12C Coupe, yet adds the thrill of open-top driving to its appeal.

Based on a revolutionary one-piece carbon MonoCell chassis weighing just 165 pounds, the 12C Spider features a bespoke 616 bhp 3.8-liter V8 twin turbo engine that powers the convertible sports car from zero to 60 mph in just 3.2 seconds (3.0 with the Corsa tire option). Top speed is 204 mph.

Vehicle dynamics technology, including Brake Steer, ProActive Chassis Control with adaptive damping and the unique McLaren Airbrake, combine to offer sublime comfort in all driving conditions, yet they deliver race car performance and handling on the track.

The new McLaren 12C Spider is proudly making its world debut at the 2012 Pebble Beach Concours d'Elegance, with the production version set to arrive in dealerships by early 2013.
