

ROLLS-ROYCE MOTOR CARS

PHANTOM COUPÉ AVIATOR COLLECTION CAR

In homage to its founder, Charles Rolls, and in celebration of the record-setting achievements of the Rolls-Royce aero R engines of the 1920s and 1930s, Rolls-Royce Motor Cars proudly presents the Phantom Series II Coupé Aviator Collection Car—the first of a very limited collection of bespoke Phantom Coupé models.

In this collection the soaring imagination that inspired experiments in flight is perfectly married to the vanguard engineering, ultramodern design and exquisitely crafted materials embodied in the 2013 Phantom Series II. Each car allows the discerning collector to relax in luxury while enjoying a journey from the earliest flights through the envelope-pushing jet age.

Select exterior colors and finishes are available only on Phantom Coupé Aviator Collection Cars, and the traditional upright Rolls-Royce

grille is replaced by a more aerodynamic sculptured unit set into a body-colored surround, offering a jet intake-like view of the front end.

The cockpit features handcrafted leather highlighted by metal accents. Mahogany veneers are painstakingly shaped by craftspeople, just as the early record-setting propellers were fashioned. Metal foil envelopes clocks and gauges designed for aircraft and presenting the latest information from the Rolls-Royce V12 power plant, which traces its lineage to the record-setting motors of history while providing the turbine smoothness and massive power of the modern jet.

A very limited number of these cars will be available beginning in the late fall.
