

Thank you for making your voice heard at one of the most critical times in our company's history. Please call 1-866-927-2233 to have your call placed to your legislator (s).

Below you'll find a suggested script to use in your message to your legislators. You may also find additional key facts and messages at www.gmfactsandfiction.com that might also be helpful in strengthening your call for support of GM and America's domestic auto industry.

It is important to note that as a constituent, your personal story and the impact a healthy, vibrant auto industry has on you, your family and your community can make your message more effective. For example, if you are one in a long line of generation of GM employees, or if GM has helped you or family members advance their education, these are just a few ways to personalize your message. Please take a look at the script before placing your call. We ask that you think about your personal circumstances that will help make the case for support of the auto industry more meaningful to your legislators.

- **Hello Senator/Congressman _____, my name is _____ and I have been an employee of [GM plant city and state] for _____ years. [Add personal detail here.]**
- **I'm calling to urge you to support GM and America's domestic auto industry. I'm one of hundreds of thousands of autoworkers. But, there are millions more Americans among suppliers, dealers, retirees and communities that depend on my industry for their livelihood and well-being.**
- **All of us need your support now. We cannot sustain our industry because of the worst financial crisis to hit our country in over half a century. We run the risk of losing all of the gains we've made over the years to make our company more competitive and to build new technologies and cars that will benefit consumers and improve our nation's energy security.**
- **Our industry is the real economy that runs through Main Street. I call on you and your Congressional colleagues to help preserve jobs and help the domestic auto industry weather this financial storm. With your support, I know my company will emerge stronger and more competitive. And, that means a stronger economy and a more competitive America.**
- **Thank you.**

If you have difficulty reaching your legislators, we ask that you please try again until you are successful at having your voice heard.

Thank you again for your support. Please know that your efforts do, and will continue to, make a difference.
