

## LEXUS LF-LC

The Lexus LF-LC concept hybrid is designed to push the limits of style, performance and technology, embodying the purest expression to date of the marque's pursuit of perfection. This 2+2 coupe combines sweeping lines with dynamic angles to create a sleek silhouette wrapped around a driver-focused interior.

Conceived primarily by the Caltz design studio in Newport Beach, California, the LF-LC concept embodies the Lexus vision of what a premium sport coupe could be. Featuring emotive, avant-garde beauty and advanced technology, the concept hybrid displays the new Lexus design language in its bold interpretation of the marque's signature spindle grille and rear architecture. The interior of

the LF-LC contrasts the cool ambience of advanced technology with soft textures and organic shapes to create a synergy of form and function. The LF-LC is a beautiful interpretation of Lexus originality.

This thought-provoking design exercise is a stunning expression of creativity combined with a next-generation hybrid powertrain that promises a rewarding driving experience that is also kind to the environment.
